**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Martin, Jr. (USP 4,618,919) in view of Archer (USP 5,177,615). Martin discloses the claimed invention having two transformers (T1 and T2) to form an LLC circuit and that supplies non-zero current; see figure below, except for having a plurality of secondary windings for use in resonant LLC converter. Archer discloses that it is known in the art to provide a plurality of secondary windings for use in resonant LLC converter. It would have been obvious to one having ordinary skill in the art at the time of the invention was made to provide the plurality of secondary windings for use in resonant LLC converter of Archer with the two transformer LLC circuit of Martin, Jr., in order to provide balanced reflected voltages since the additional secondary windings are correctly ratio.
